

Command Your Construction Empire

Replace endless paperwork and chaotic phone calls with a single, easy-to-use app designed to help you run your entire construction business effortlessly.

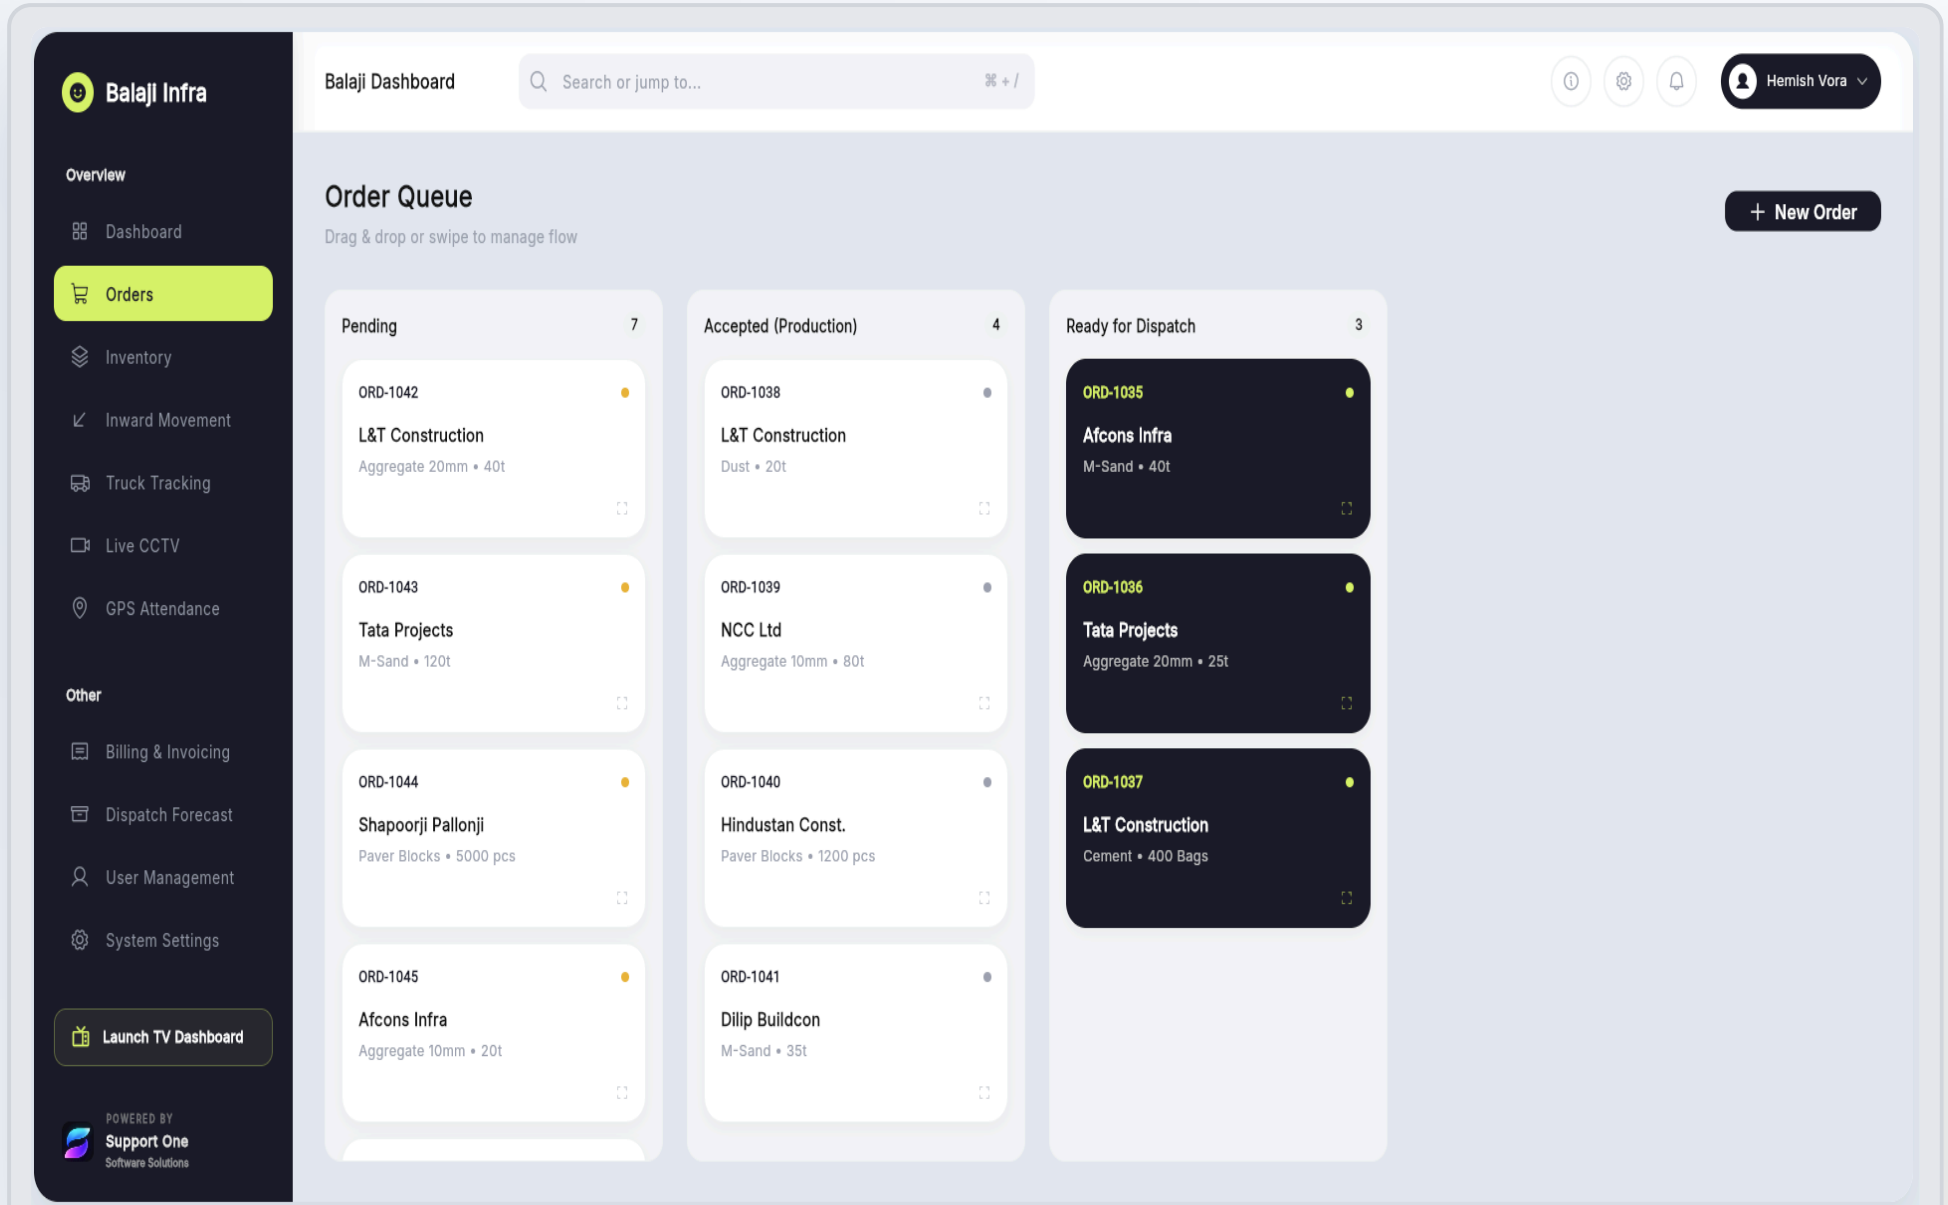

The image shows a login screen for the Balaji Infra app. At the top is a circular logo with a yellow building icon. Below it, the text "Balaji Infra" is displayed, followed by the tagline "Manage your plants, anytime, anywhere". There are two buttons: "Phone" (highlighted in green) and "Email". Below these is a "Phone Number" input field with a placeholder "+91 Enter your phone number". A checkbox labeled "Remember this device" is present. At the bottom is a dark "Login" button.

Your Business at a Glance

Watch your entire operation come to life. Monitor live production across your Crusher, RMC, and Paver plants while keeping a close eye on your team's attendance.

Simple Order Management

Keep your customers happy and orders flowing smoothly. Simply drag and drop orders to move them quickly from pending, to production, and straight out to dispatch.

Always Know Your Stock

Never run out of materials again. Beautiful, live gauges show exactly how much aggregate and sand you have left, while managers can easily record quick voice notes at the end of the day.

Track Every Truck Live

Say goodbye to guessing where your deliveries are. Watch your trucks move live on the map, ensure drivers stay on route, and make sure your materials reach the site on time.

Fast & Simple Weighments

Built tough for the field. Operators can instantly capture truck weights directly from the scale and snap security photos without ever worrying about losing their internet connection.

The screenshot displays the 'Balaji Dashboard' interface for live surveillance. On the left is a dark sidebar with a 'Balaji Infra' header and a menu including Overview, Dashboard, Orders, Inventory, Inward Movement, Truck Tracking, Live CCTV (highlighted), GPS Attendance, and Other (Billing & Invoicing, Dispatch Forecast, User Management, System Settings). A 'Launch TV Dashboard' button is at the bottom of the sidebar. The main content area is titled 'Live CCTV Feeds' and shows 'RTSP streams from all plant locations'. It features a grid of six camera feeds: 'Crusher Primary', 'Weighbridge Entry', 'Dispatch Yard', 'Inventory Stockpile', 'RMC Plant Area', and 'Main Gate'. Each feed is currently black with a camera icon and a full-screen button. Top right controls include 'Add Camera' and 'Live Recording' buttons, and a user profile for 'Hemish Vora'.

Tailored to Your Business

Make the ERP completely yours. Quickly update your company details, GST numbers, and configure notifications so the system works exactly how you want it to.

Built for the Field.

Designed for dusty environments, bright sunlight, and dropped connections.

Always Works, No Matter What

Internet goes down? No problem. Continue logging weighments and punching in attendance. Everything saves locally and uploads the moment you get a signal back.

Instant Updates

Everything feels alive. Whether a truck leaves the yard or new materials are produced, your screens update instantly without you ever having to refresh.

Made for Dusty Fingers

We designed the app with massive buttons, bright colors, and full Hindi support so your on-site team never struggles to tap the right thing in a hurry.

Works on Any Device

Access your business from anywhere. Hand out Android tablets to the yard team, use Windows PCs at the weighbridge, and check your iPad from the comfort of the main office.
