Bring Your Data To The Big Screen

A beautiful, immersive TV experience designed to keep your entire office in sync. Effortlessly monitor your live solar energy, track your delivery fleet, and keep an eye on your facilities from any large display.

Pro Features. Massive Scale.

Solar Analytics

Live generation curves and real-time efficiency metrics mapped perfectly to your display.

Global Fleet

Every vehicle pinpointed live on a rich, interactive world map.

Smart CCTV

AI Vision

Spatial UI

Fluid, frosted interfaces that react to lighting and blend into your room.

Night Mode

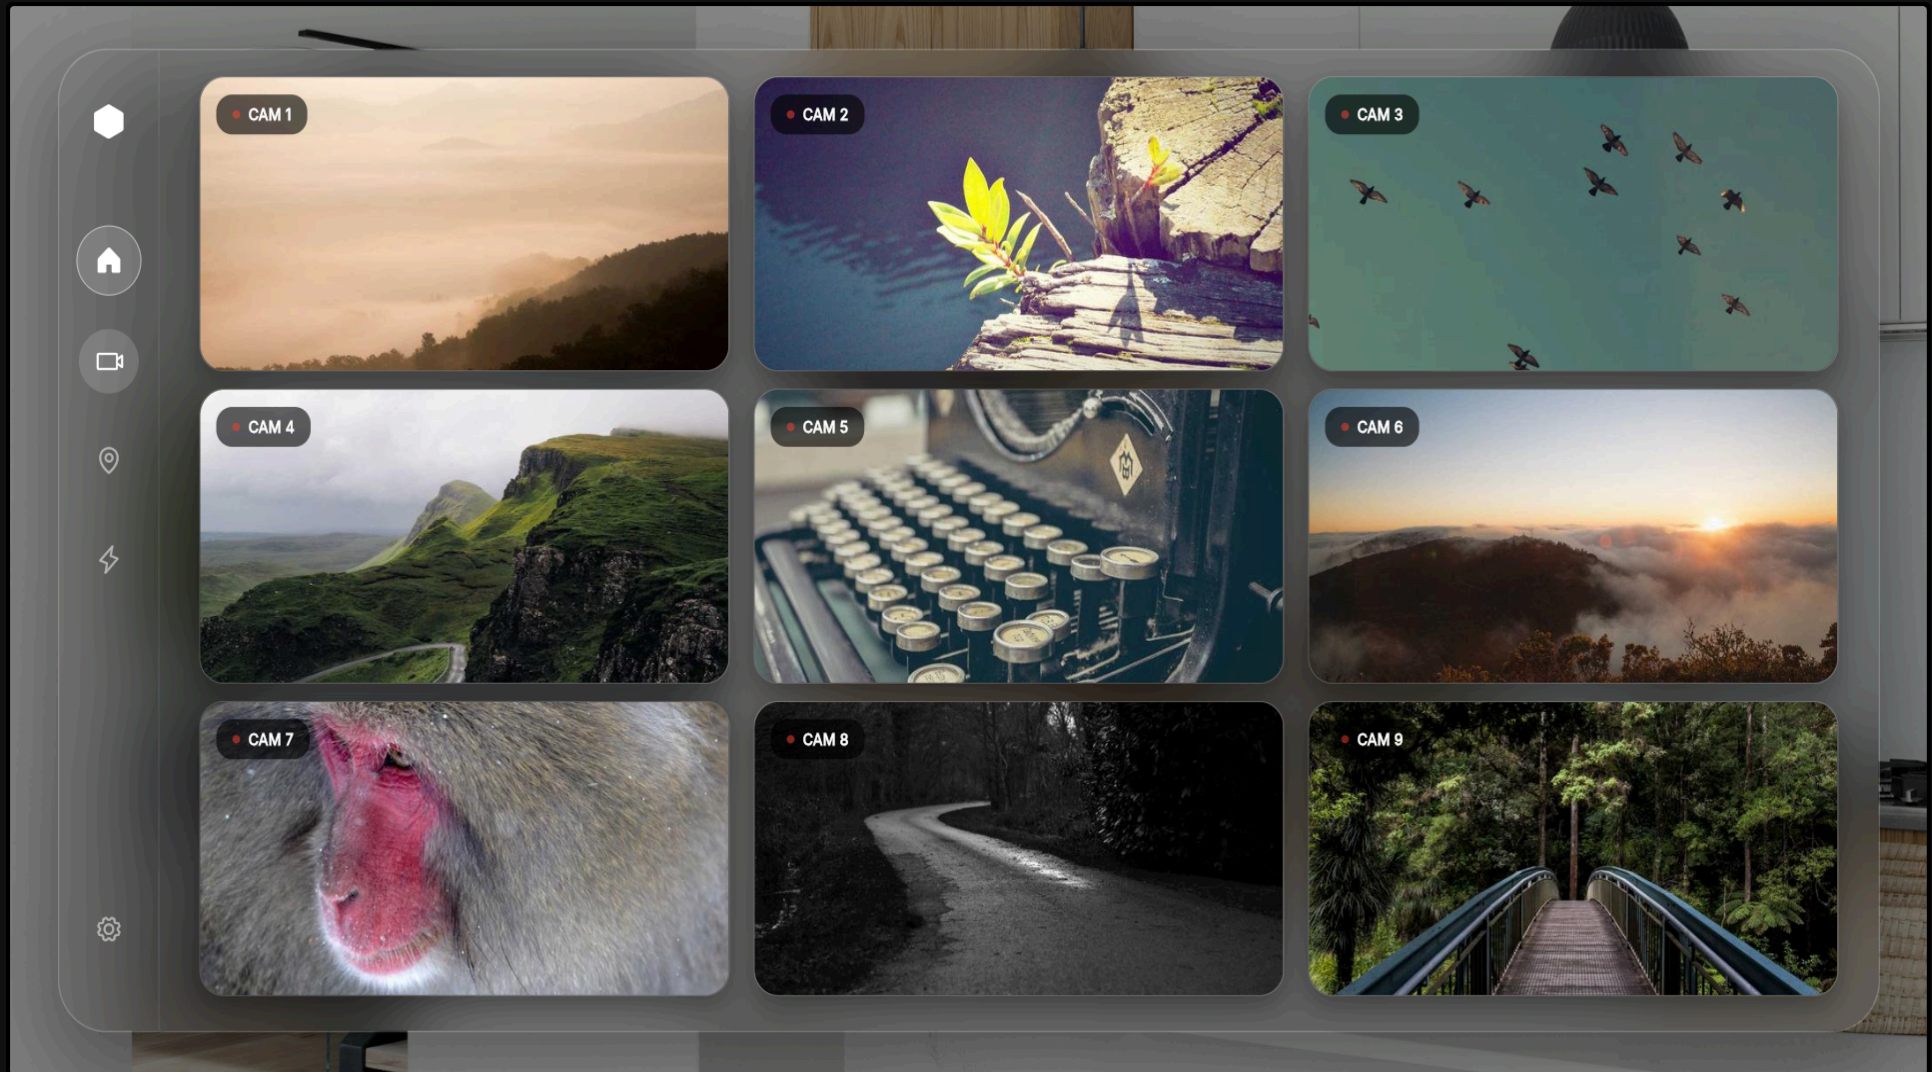

Control

Live Solar & Energy Hub

Give your office a beautiful focal point. This screen combines your live solar power output, weekly charts, active fleet count, and security cameras into one stunning TV view.

Big Screen Security

Transform your conference room TV into a security center. Watch up to 9 cameras at once, with smooth automatic rotations so you always know what's happening around your facilities.

Your Fleet on the Big Screen

No need to squint at a phone. Display a massive, live-updating map on your office TV so the logistics team can instantly spot where every truck and driver is located.

Understand Your Energy

We've made complex data beautiful and easy to understand from across the room. Watch your energy generation curve grow throughout the day alongside your historical performance.
